

Bước 1. Tạo 3 bảng, bảng 1: tbl_payment

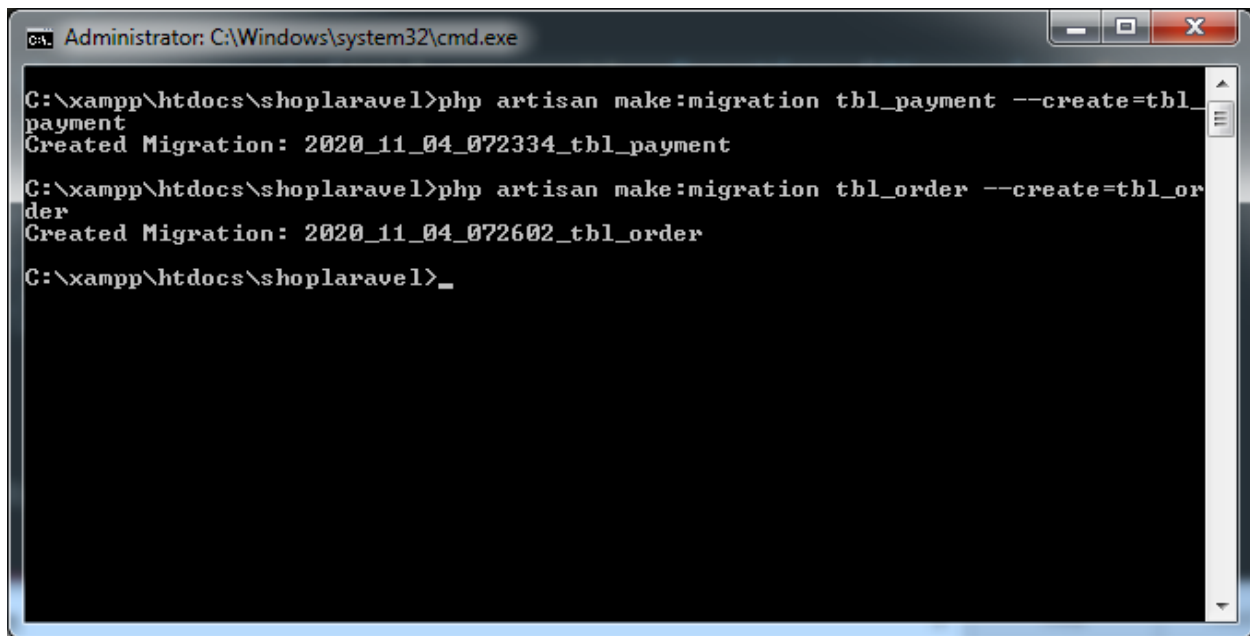

```
Administrator: C:\Windows\system32\cmd.exe
C:\xampp\htdocs\shoplaravel>php artisan make:migration tbl_payment --create=tbl_payment
Created Migration: 2020_11_04_072334_tbl_payment
C:\xampp\htdocs\shoplaravel>
```

Bảng tbl_payment có các trường như sau

public function up()

```
{
    Schema::create('tbl_payment', function (Blueprint $table) {
        $table->bigIncrements('payment_id');
        $table-> integer('payment_method');
        $table-> string ('payment_status');
        $table->timestamps();
    });
}
```

Bước 2. Tạo bảng đơn hàng

```
C:\Windows\system32\cmd.exe

C:\xampp\htdocs\shoplaravel>php artisan make:migration tbl_payment --create=tbl_payment
Created Migration: 2020_11_04_072334_tbl_payment

C:\xampp\htdocs\shoplaravel>php artisan make:migration tbl_order --create=tbl_order
Created Migration: 2020_11_04_072602_tbl_order

C:\xampp\htdocs\shoplaravel>
```

Cấu trúc bảng tbl_order như sau

```
$ public function up()
```

```
{
```

```
    Schema::create('tbl_order', function (Blueprint $table) {
```

```
        $table->bigIncrements('order_id');
```

```
        $table->integer('customer_id');
```

```
        $table->integer('shipping_id');
```

```
        $table->integer('payment_id');
```

```
        $table->string('order_total');
```

```
        $table->integer('order_status');
```

```
        $table->timestamps();
```

```
    });
```

```
}
```

Bước 3. Tạo bảng order_details như sau

```
public function up()
{
    Schema::create('tbl_order_details', function (Blueprint $table) {
        $table->bigIncrements('order_details_id');
        $table->integer('order_id');
        $table->integer('product_id');
        $table->string('product_name');
        $table->float('product_price');
        $table->integer('product_sales_quantity');
        $table->timestamps();
    });
}
```

Bước 4. Thực thi lệnh tạo bảng

Php artisan make:migrate

Câu 2 Tạo hàm order_place

Bước 1. Mở route/web.php tạo lệnh gọi hàm

```
Route::post('/order-place','CheckoutController@order_place');
```

Bước 2. Mở checkoutController tạo hàm

```
public function order_place(Request $request){
    //insert payment_method
    //seo
```

```
$meta_desc = "Đăng nhập thanh toán";  
$meta_keywords = "Đăng nhập thanh toán";  
$meta_title = "Đăng nhập thanh toán";  
$url_canonical = $request->url();  
  
/--seo  
  
$data = array();  
$data['payment_method'] = $request->payment_option;  
$data['payment_status'] = 'Đang chờ xử lý';  
$payment_id = DB::table('tbl_payment')->insertGetId($data);  
  
//insert order  
  
$order_data = array();  
$order_data['customer_id'] = Session::get('customer_id');  
$order_data['shipping_id'] = Session::get('shipping_id');  
$order_data['payment_id'] = $payment_id;  
$order_data['order_total'] = Cart::total();  
$order_data['order_status'] = 'Đang chờ xử lý';  
$order_id = DB::table('tbl_order')->insertGetId($order_data);  
  
//insert order_details  
  
$content = Cart::content();  
foreach($content as $v_content){  
    $order_d_data['order_id'] = $order_id;
```

```
$order_d_data['product_id'] = $v_content->id;

$order_d_data['product_name'] = $v_content->name;

$order_d_data['product_price'] = $v_content->price;

$order_d_data['product_sales_quantity'] = $v_content->qty;

DB::table('tbl_order_details')->insert($order_d_data);

}

if($data['payment_method']==1){

    echo 'Thanh toán thẻ ATM';

}elseif($data['payment_method']==2){

    Cart::destroy();

    $cate_product = DB::table('tbl_category_product')-
>where('category_status','1')->orderby('category_id','desc')->get();

    $brand_product = DB::table('tbl_brand')->where('brand_status','1')-
>orderby('brand_id','desc')->get();

    return view('pages.checkout.handcash')->with('category',$cate_product)-
>with('brand',$brand_product)->with('meta_desc',$meta_desc)-
>with('meta_keywords',$meta_keywords)->with('meta_title',$meta_title)-
>with('url_canonical',$url_canonical);

}else{

    echo 'Thẻ ghi nợ';
```

```
}

//return Redirect::to('/payment');

}
```

Câu 3. Tạo thông báo kết thúc mua hàng

Trong thư mục view/checkout/ tạo tệp handcash.blade.php

```
@extends('layout')
```

```
@section('content')
```

```
<section id="cart_items">
```

```
<div class="container">
```

```
<div class="review-payment">
```

```
<h2>Cảm ơn bạn đã đặt hàng ở chỗ chúng tôi, chúng tôi  
sẽ liên hệ với bạn sớm nhất</h2>
```

```
</div>
```

```
</div>
```

```
</section> <!--/#cart_items-->
```

@endsection
