

## Nội dung 1. Hiển thị danh mục sản phẩm ra trang chủ

Bước 1. Mở controller HomeController. Sửa hàm index() theo nội dung sau

Bổ sung thư viện

use DB;

use Session;

use App\Http\Requests;

use Mail;

use Illuminate\Support\Facades\Redirect;

session\_start();

Sửa hàm index()

class HomeController extends Controller

{

public function index(){

```

    $cate_product = DB::table('tbl_category_product')-
    >where('category_status','1')->orderby('category_id','desc')->get();

    return view('pages.home')->with('category',$cate_product);

}

}

```

Bước 2. Trong thư mục view/elements. Mở tệp sidebar.blade.php sửa lại nội dung sau.

Tìm nội dung trong thẻ `<!--category-products-->` và xóa nội dung html

```

sidebar.blade.php
<div class="left-sidebar">
  <h2>Category</h2>
  <div class="panel-group category-products" id="accordian">
    <!--category-products-->

  </div><!--/category-products-->

  <div class="brands_products"><!--brands_products-->
    <h2>Brands</h2>
    <div class="brands-name">
      <ul class="nav nav-pills nav-stacked">
        <li><a href="#"> <span class="pull-right">(50)</
        Acne</a></li>
        <li><a href="#"> <span class="pull-right">(56)</
        Grüne Erde</a></li>

```

Thêm đoạn code sau

```
@foreach($category as $key => $cate)
```

```

    <div class="panel panel-default">

        <div class="panel-heading">

            <h4 class="panel-title"><a href="{ { URL::to('/danh-muc-
            san-pham/'.$cate->slug_category_product) } }">{ { $cate-
            >category_name } }</a></h4>

        </div>

```

&lt;/div&gt;

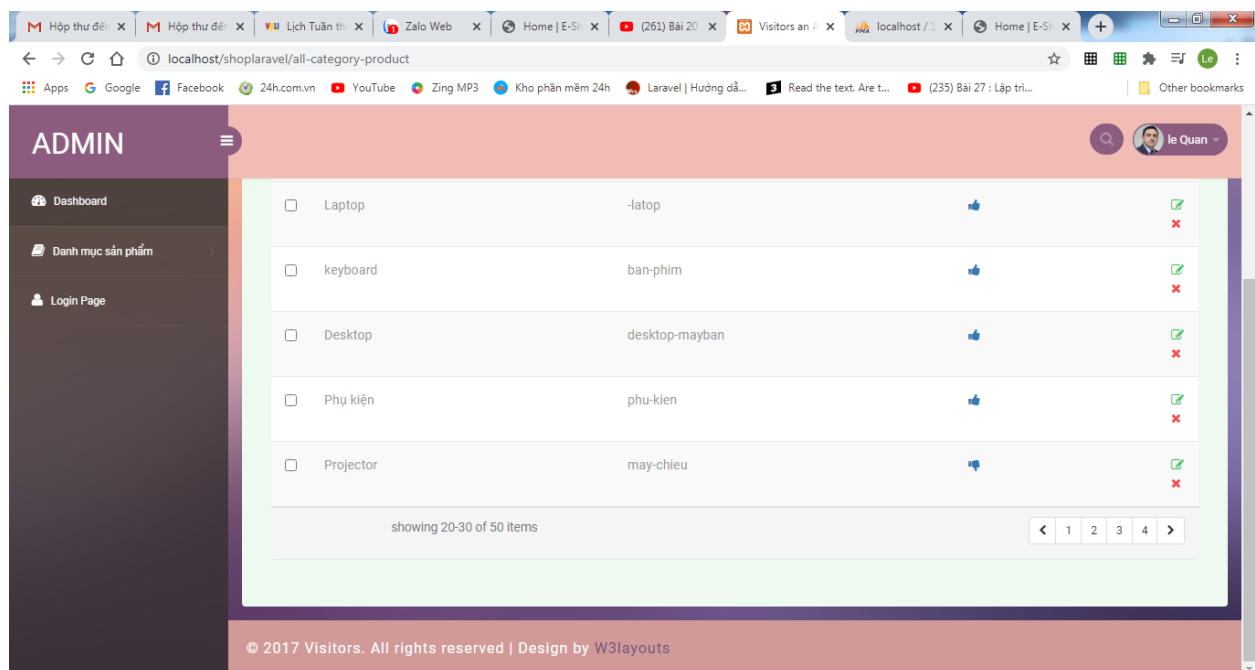

@endforeach

```

1 <div class="left-sidebar">
2   <h2>Category</h2>
3   <div class="panel-group category-products" id="accordion">
4     <!--category-products-->
5     @foreach($category as $key => $cate)
6       <div class="panel panel-default">
7         <div class="panel-heading">
8           <h4 class="panel-title"><a href="{{URL::to('/
              danh-muc-san-pham/' . $cate->slug_category_product)}}"
              >{{$cate->category_name}}</a></h4>
9         </div>
10      </div>
11    @endforeach
12  </div><!--/category-products-->
13
14

```

Nội dung 2: Ẩn hiện danh mục sản phẩm. Like là hiện, dislike là ẩn

Bước 1. Mở controller Categoryproduct bổ sung 2 hàm sau

// an hien danh muc san pham; 1 la hien, 0 la an

```
public function unactive_category_product($category_product_id){  
    $this->AuthLogin();  
  
    DB::table('tbl_category_product')-  
>where('category_id',$category_product_id)->update(['category_status'=>0]);  
  
    Session::put('message','Ẩn danh mục sản phẩm, update thành công');  
  
    return Redirect::to('all-category-product');  
  
}  
  
public function active_category_product($category_product_id){  
    $this->AuthLogin();  
  
    DB::table('tbl_category_product')-  
>where('category_id',$category_product_id)->update(['category_status'=>1]);  
  
    Session::put('message','Kích hoạt danh mục sản phẩm thành công');  
  
    return Redirect::to('all-category-product');  
  
}
```

Bước 2. Mở lại file all\_category\_product.blade.php xem thiết lập link active và unactive

```

46 <th>Slug</th>
47 <th>Hiển thị</th>
48
49 <th style="width:30px;"></th>
50 </tr>
51 </thead>
52 <tbody>
53 @foreach($all_category_product as $key => $cate_pro)
54
55 <tr><td><input type="checkbox" name="post[]"></td>
56 <td>{{ $cate_pro->category_name }}</td>
57 <td>{{ $cate_pro->slug_category_product }}</td>
58 <td><span class="text-ellipsis">
59
60 <?php
61 if($cate_pro->category_status==1){
62 >
63 <a href="{{URL::to('/unactive-category-product/'.$cate_pro->category_id)}}"
64 ><span class="fa-thumb-styling fa fa-thumbs-up"></span></a>
65 <?php
66 }else{
67 >
68 <a href="{{URL::to('/active-category-product/'.$cate_pro->category_id)}}"
69 ><span class="fa-thumb-styling fa fa-thumbs-down"></span></a>
70 <?php
71 }
72 >
73 </td>
74 <td>
75 <a href="{{URL::to('/edit-category-product/'.$cate_pro->category_id)}}" class
  
```

Bước3. Thiết lập routes/web.php như sau:

Route::get('/unactive-category-product/{category\_product\_id}','CategoryProduct@unactive\_category\_product');

Route::get('/active-category-product/{category\_product\_id}','CategoryProduct@active\_category\_product');
