

Bài 24. Tạo chức năng tìm kiếm

Mở thư mục pages.sanpham tạo tệp search.blade.php

Bước 2. Mở route/web.php sửa lại lệnh gọi hàm

```
Route::post('/tim-kiem','HomeController@search');
```

Bước 3. Mở HomeController

```
public function search(Request $request){
```

```
    $keywords = $request->keywords_submit;
```

```
    $cate_product = DB::table('tbl_category_product')-  
>where('category_status','1')->orderby('category_id','desc')->get();
```

```
    $brand_product = DB::table('tbl_brand')->where('brand_status','1')-  
>orderby('brand_id','desc')->get();
```

```
    $search_product = DB::table('tbl_product')-  
>where('product_name','like','%'.$keywords.'%')->get();
```

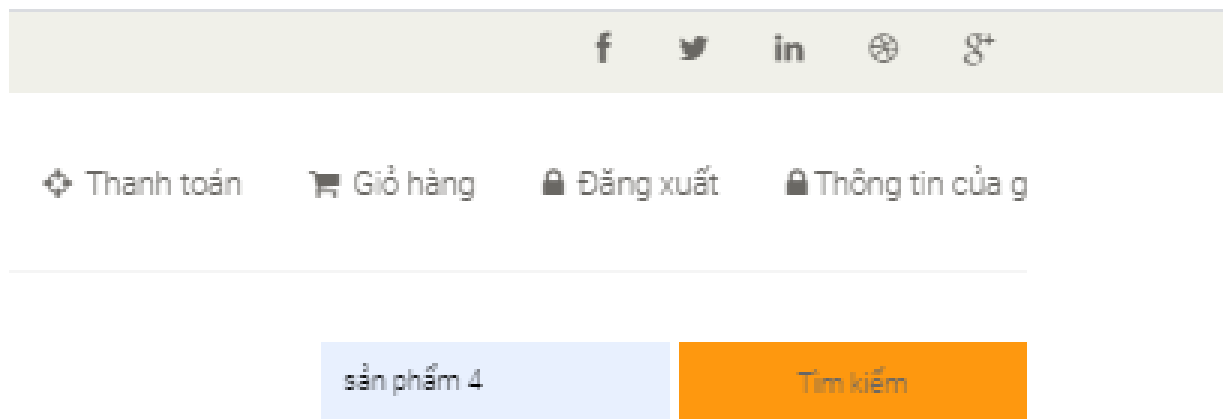

```

        return view('pages.sanpham.search')->with('category',$cate_product)-
        >with('brand',$brand_product)->with('search_product',$search_product);

    }

```

Bước 3. Mở element/top.blade.php chỉnh sửa lại nút tìm kiếm

Tìm đoạn code sau

```

<div class="col-sm-3">

    <div class="search_box pull-right">

        <input type="text" placeholder="Search"/>

    </div>

</div>

```

Sửa Thành

```

<div class="col-sm-4">

    <form action="{{ URL::to('/tim-kiem') }}" method="POST">

```

```
{{ csrf_field() }}
```

```
<div class="search_box pull-right">
```

```
<input type="text" name="keywords_submit" placeholder="Tìm  
kiếm sản phẩm"/>
```

```
<input type="submit" style="margin-top:0;color:#666"  
name="search_items" class="btn btn-primary btn-sm" value="Tìm kiếm">
```

```
</div>
```

```
</form>
```

```
</div>
```

Chú ý col-sm bên phải thì sửa thành <div class="col-sm-8">
