Bước 1. Mở trang sidebar.blade.php bổ sung phần thương hiệu

```
<div class="brands_products"><!--brands_products-->

              <h2>Thương hiệu sản phẩm</h2>

              <div class="brands-name">

                <ul class="nav nav-pills nav-stacked">

                  @foreach($brand as $key => $brand)

                    <li><a href="{{URL::to('/thuong-hieu-san-pham/'.$brand->brand_slug)}}"> <span class="pull-right">(50)</span>{{$brand->brand_name}}</a></li>

                  @endforeach

                </ul>

              </div>

            </div><!--/brands_products-->
```

Bước 2. Mở controller HomeController thực hiện bổ sung hàm index()

```
$brand_product = DB::table('tbl_brand')->where('brand_status','1')->orderby('brand_id','desc')->get();

return view('pages.home')->with('category',$cate_product)->with('brand',$brand_product)
```
